

2024 Subject Index

Title	Page
Advancing defense capabilities through integration of electro-optical systems and computer vision technologies	17
Determination of I-V curves for photovoltaic generator by an analytical method; Akbaba model	52
Developing next-generation educational mobile games in light of technological trends: a study 1 on the "Obstacle Run" game	
Diabetes prediction utilizing soft voting classifier	31
Hybrid charging station integration of solar power and IGBT technology for sustainable electric vehicle fast charging	5
Personalized special training follow-up application Cardiofit2	25
Sentiment analysis with machine learning for drug reviews	35
Steering angle prediction in autonomous vehicles: a deep learning approach combining Vgg16 and Lstm	46
Vision assistant for visually impaired individuals	62
Wireless power transfer systems and wireless charging design between electric vehicles	56
