Journal of

Computer & Electrical and Electronics Engineering Sciences

EDITORIAL

Dear Colleagues,

Academic journals are one of the most essential elements of the academy, where researchers announce their findings to the scientific world. Therefore, an academic journal should have continuity, stability, and quality characteristics.

I am honored and happy to greet you with the first issue of our journal, "Journal of Computer & Electrical and Electronics Engineering Sciences," which we set out to contribute to the scientific world with the great sense of responsibility brought by academic publishing and quality publishing.

Our journal, which aims to publish original and high-quality studies in Computer Engineering and Electrical-Electronics Engineering, started its publication to announce new studies and original research in the field to the scientific world.

Our journal, which evaluates the principle of blind refereeing, is also sensitive to protecting personal data and ethical concerns.

Our journal, which we plan to be published as two issues a year, will climb the steps of quality in academic publishing one by one. My belief comes from our publishing team, who work voluntarily for this job. As the editor-in-chief, I would like to thank this beautiful team dedicated to science.

We know that with each subsequent issue, our intensity will increase; However, with our commitment to science, we will continue to offer you the latest studies as a team without compromising our principles. I want to express my sincere gratitude and respect to you, our readers, writers, referees, and our publishing team working with great devotion; I sincerely look forward to your comments and suggestions for improving our journal.

Assist.Prof.Dr. Fuat Türk, PhD
Editor-in-Chief

CONTENTS

Volume: 1 Issue: 2 Year: 2023

ORIGINAL ARTICLES

Personalized daily-weekly workout arrangement application “cardio fit”	25-28
<i>Ataman Z, Heybet ME, Sarısoy F, Yılmaz B, Günay M, Şenel Ö.</i>	
Cryptocurrency analysis using machine learning and deep learning approaches.....	29-33
<i>Muhammed Sakran F.</i>	
Controlling the operation of the dc motor by using pid with metaheuristic technology.....	34-40
<i>Khalaf KAK, Teke M.</i>	
Classification of heart disease dataset with k-NN optimized by pso and gwo algorithms	41-45
<i>Lüy M, Metin NA.</i>	
Machine learning methods on quantized vectors.....	46-49
<i>Tanyeri U, Dindar T, Kökver Y, Koçak NF</i>
